Futura Advanced Cable Tester - FACT-256

Futura offers **FACT-256** Cable Tester. It is developed considering user's convenience. In addition to all features in Futura's PHTM model, FACT has features in line with advanced technology. Features in PHTM such as expandable, ease of data loading, on-line label printing, barcode scanner attachment, two stage testing etc. are included in FACT. Since March 2013, FACT has an additional mode POKAYOKE mode of testing. This mode facilitates locking of harness on the board and putting harness in the fail bin. It has checking of diodes in addition to continuity. Diodes are checked for correct polarity and a faulty diode. Any combination of diodes can be checked. Factory settings are added.

Salient features of FACT are

- Physical key in PHTM is replaced by soft key. Soft key is any USB pen drive. One can create managers, supervisors and operators using our windows based software.
- Diagnostics mode is added. It is like self test for serial port, parallel port, RTC etc.
- Tone and volume control are made soft. These can be set from keyboard.
- Sleek look and light weight.
- Headphones attachment does not disturb the shopfloor.
- D type connectors are replaced by 64 pin flat cable connectors.
- Display is 4 lines, conveys more information.
- Data can be loaded using any standard USB pendrive.
- A windows based software will help in easy data transfer.
- Easy migration of boards used with PHTM.
- FACT-256 can be expanded by adding expander units.
- FACT uses state of the art technology.

Complete video based manual is included in CD.

FACT is simple, easy to use, reliable tester and it comes with Futura's support.
